

CONTENTS

	Section
Key activities and results for 2001 - 2002	1
Land Use Change and Forestry: The 2000 UK Greenhouse Gas Inventory and projections to 2020. <i>R. Milne, R. W. Tomlinson, M. Cruickshank and T.D. Murray</i>	2
Methodological developments for the UK LUCF GHG Inventory <i>R. Milne</i>	3
Field Measurements of Carbon Loss Due to Ploughing <i>K. J. Hargreaves, T. D. Murray and E. Nemitz.</i>	4
Linking Soil and Vegetation Carbon in Dynamic Models <i>G. Sozanska, P Smith, R. Milne, and T. A.W. Brown</i>	5
Mapping of carbon uptake in British woodlands and forests using EuroBiota and C-Flow <i>R. Milne and T. A. W. Brown</i>	6
Deforestation rates in the United Kingdom <i>P. Levy, and R. Milne (with Appendix by D. Howard)</i>	7
Modelling the impact of climate change and nitrogen deposition on carbon sequestration of UK plantation forests. <i>M. Murray, J. Thornley and M.G.R. Cannell</i>	8
Forest Research permanent mensuration sample plots and methods for comparison of the CFLOW and CARBINE carbon accounting models <i>R. Matthews</i>	9
