Global Atmosphere Division

CONTENTS

	Section
Key activities and results for 2000 - 2001	1
The Land Use Change and Forestry Sector in the 1999 UK Greenhouse Gas Inventory. <i>R Milne, R W Tomlinson and J Gauld</i>	2
Country specific data for the UK relating to Articles 3.3 and 3.4 of the Kyoto protocol: An Update. <i>R Milne and P Smith</i>	3
Carbon balance of afforested peatland in Scotland <i>K J Hargreaves, R Milne and M G R Cannell</i>	4
Field measurements of carbon loss from soil following ploughing Part 1: Flux measuring methods <i>K J Hargreaves, T D Murray and E Nemitz.</i>	5
Field measurements of carbon loss from soil following ploughing Part 2: Carbon content of soils along the proposed 'flux' transect at Poldean Farm prior to ploughing <i>H.E Jones, J.S. Garnett, K. Hargreaves, J. Parrington and T. Murray</i>	6
Combining plant and soil C cycling models – consideration of methods <i>P Falloon and P Smith</i>	7
Modelling of carbon uptake in UK forests using the EuroBiota model <i>R Milne and T A W Brown</i>	8
Review of data sources for estimation of deforestation rates in the United Kingdom <i>R Matthews</i>	9
Effectiveness of carbon accounting methodologies for LULUCF and harvested wood products in supporting climate-conscious policy measures. <i>R. Matthews and R. Heaton</i>	10
